### DETAILED ACTION

1. The finality of the final rejection is now withdrawn due to the discovery of additional prior art.
2. Applicant's amendment and accompanying remarks filed August 19, 2003 have been acknowledged.
3. The rejection of claims 1-8 and 11-14 under 35 U.S.C. 102 (b) as being anticipated by JP 11-008068 is withdrawn due to applicant's amended claims and argument.
4. The rejection of claims 9-10 under 35 U.S.C 103 (a) as being unpatentable over JP 11-008068 in view of Araki et al., U.S. Patent Number 6,489,045 is withdrawn due to applicant's amended claims and argument.

### *Claim Rejections - 35 USC § 112*

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

6. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. R<sup>1</sup> and R<sup>2</sup> are disclosed as not being bonded to each other. Thus, they would not form a saturated carbon ring.

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claims 1-10 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Hosokawa et al., U.S. Patent Number 6,534,199.

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C.

102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Hosokawa discloses a an organic electroluminescence device comprising a layer of an organic light emitting medium which is disposed between a pair of electrodes wherein the organic medium comprises mono-, di-, tri- or tetrastaryl derivatives containing amine and anthracene derivatives (see column 2, lines 34-60). Additionally, the reference discloses in column 25, lines 58-68 hole injecting and electron injecting layers in the construction of the EL device as per instant claims 3-10. The structure, EM49, found in the reference in column 22 reads on compounds in instant claims 1-2 and 13.

***Double Patenting***

9. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

10. Claims 1-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 4 and 9 of U.S. Patent No. 6,534,199. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the reference and applicant's claims disclose an organic electroluminescence device comprising of a layer of an organic light emitting medium that is disposed between a pair of electrodes wherein the organic medium comprises mono-, di-, tri and tetrastaryl derivative containing amine and anthracene derivative compounds.
